## ENSAfrica launches ENSafrica | intelligENS

ENSAfrica, **Africa's largest law firm**, has just launched "**ENSAfrica | intelligENS**". ENSafrica | intelligENS is a specialist division within the firm, which has been established to provide clients with products and services that are powered by cutting-edge, digital systems using artificial intelligence.

This new offering enables clients to conduct **sophisticated analyses of information**, which is particularly useful when there is a requirement to process large volumes of data **in fast turnaround times**.

ENSAfrica | intelligENS's capabilities include the:

- collection of information from various platforms and types of storage media or devices, in-house, at clients' premises or remote premises
- filtering and classification of information, deleting irrelevant information, extracting key threads and cataloguing information to ensure relevant material can be found quickly
- analysis of information to determine relevant trends, associations, patterns and to find the specific information required for a variety of business purposes.

Whether for purposes of due diligence, e-discovery, cyber security, governance, digital forensics, research or otherwise, ENSafrica | intelligENS is able to bring a **new level of speed and accuracy** to data interrogation and cataloguing. As the tools and systems that ENSafrica | intelligENS uses are **deployed in-house**, no outsourcing is required. This provides the benefit to clients of unique, time-cost efficiencies, which are underpinned and guaranteed by highly experienced law, digital forensics, e-discovery and risk-management experts.

ENSAfrica | intelligENS offers these new products and services **across Africa**, supported by the firm's offices in Southern, East and West Africa and Mauritius.
